

Selenium working at glance-

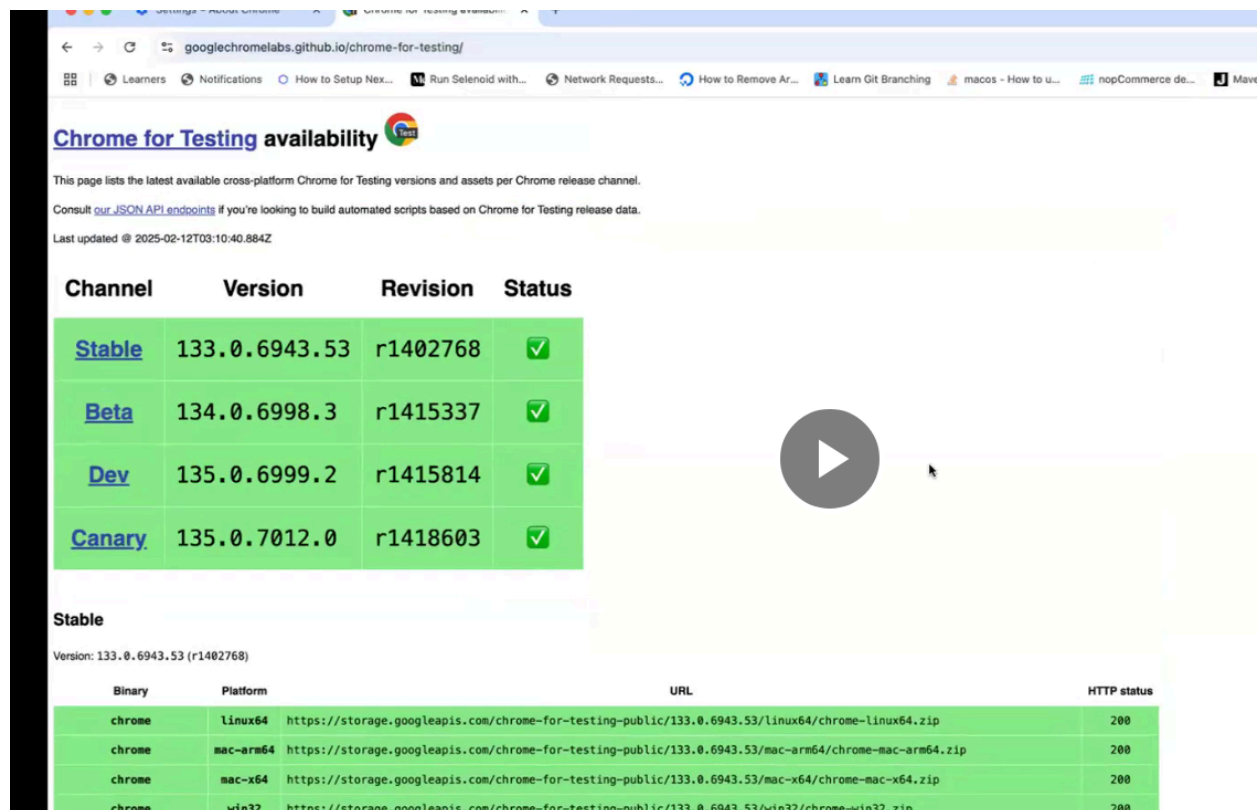

When selenium version is 4.0.0 and we dont set property then error-

```
1 package seleniumsessions;
2
3 import org.openqa.selenium.WebDriver;
4 import org.openqa.selenium.chrome.ChromeDriver;
5
6 public class LaunchTest {
7
8     public static void main(String[] args) {
9
10        WebDriver driver = new ChromeDriver();
11
12    }
13
14 }
15
16
```

Exception in thread "main" java.lang.IllegalStateException: The path to the driver executable must be set in the WebDriverRegistryOptions...

Olden days-

```
launchtests.java X
1 package seleniumbatch;
2
3 import org.openqa.selenium.WebDriver;
4 import org.openqa.selenium.chrome.ChromeDriver;
5
6 public class launchtests {
7
8     public static void main(String[] args) {
9
10         //when selenium version is 4.0.0
11         //then this line wont work.
12         //gives illegal state exception.
13         // WebDriver driver = new ChromeDriver();
14
15         //with older selenium we have to set browser exe like this.
16         //windows:
17         //System.setProperty("webdriver.chrome.driver",
18         //"c:\\Users\\naveenautomationlabs\\Documents\\mydrivers\\chromedriver.exe");
19
20         //mac/linux:
21         //System.setProperty("webdriver.chrome.driver",
22         //"/Users/naveenautomationlabs/Documents/mydrivers/chromedriver");
23     }
24 }
25
26
```

Go to cache folder-

We can see all the downloaded drivers.

Safari-

Allow remote automation for automation to work.
